Control Cables

Beechcraft Baron and Bonanza

Engine control cables are now available with color-coded plastic or weather resistant, long lasting color-coded anodized aluminum control knobs. Ask for details.

CenTex replacement engine control cables offers improved design and lower cost. An inner Teflon™ lining lowers friction resulting in a control cable that lasts longer and moves more freely allowing easier and more precise engine control. Control cables are available with color coded plastic knobs or with long lasting more durable, weather resistant, non-color fading machined anodized aluminum knobs, ask for details. And remember, CenTex ships to FBOs worldwide!

Beechcraft Baron E55, 58, 58P, and 58TC
