BEECHCRAFT KING AIR 200 & 300 SERIES SADDLE TANKS ILLUSTRATED PARTS CATALOG

INTRODUCTION

SCOPE

This Illustrated Parts Catalog (IPC) provides an illustrated list of the equipment installed under STC SA11142SC for Beechcraft King Air 200 & 300 series aircraft. The information contained herein should be used as reference only to help with ordering replacement parts when necessary. The STC drawings contain the FAA approved data and may supersede the information in the parts lists until this IPC is updated to reflect the latest drawings.

FORMAT

The IPC is divided into the following chapters:

CHAPTER	TITLE
11	PLACARDS AND MARKINGS
28	FUEL
52	DOORS
54	NACELLES/PYLONS

Each chapter is broken down into systems, installations, assemblies, and detail parts similar to the format used in the Beechcraft IPC. The example on the next page shows the basic format. The following terms used in the parts lists are defined below.

ITEM – the item number in the parts list corresponds to the item number in the illustration.

PART NUMBER – lists the part number of the item. The number can be a Centex Aerospace (CTA) part number, a vendor number, or a mil-spec number.

NOMENCLATURE – name of the part and if it is a detail part, an assembly or installation.

EFFECTIVITY – if listed, the serial numbers of the aircraft eligible for the specific part installation. If the parts are eligible for installation on all serial number airplanes, the column is left blank.

UNITS/ASSY – quantity of the parts used for the next higher assembly of the part. Quantity of “ATTACHING PARTS” is typically the number of parts required to attach one unit of the part they attach.

UPDATES

This IPC and any subsequent revisions are available on the following website: www.centex.aero/documents. Changes to the IPC will be identified by revision number and date in the Revision Log.

ASSISTANCE

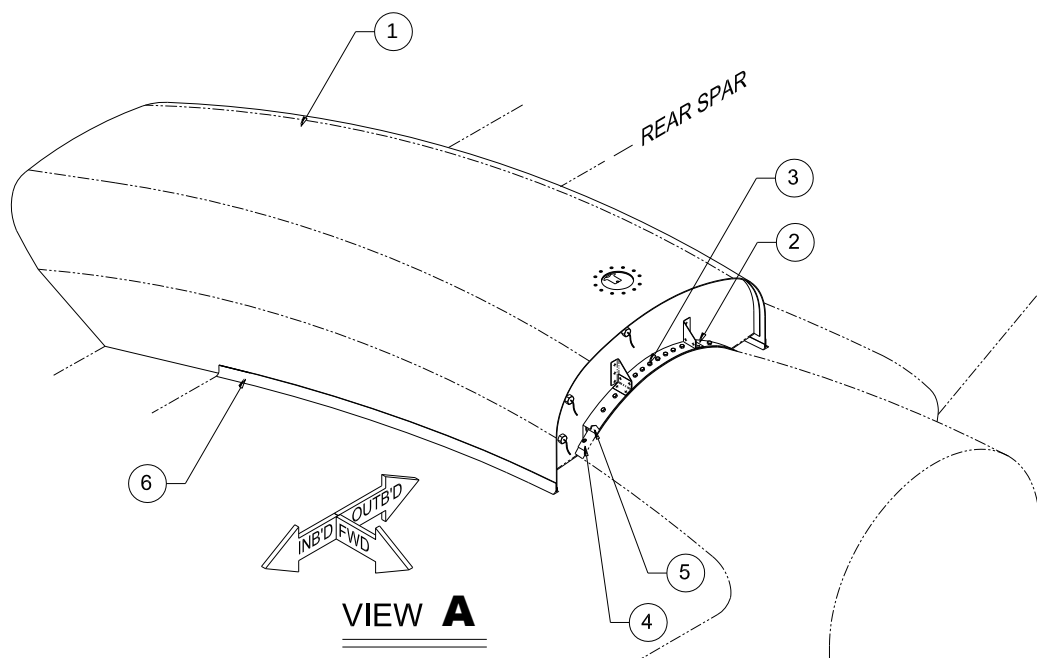

For assistance with parts or any other issues related to this STC, contact Centex Aerospace at the following address or telephone number.
